CRYPTOGRAPHIC FINGERPRINT (SHA-256)

a1b2c3d4e5f6a1b2c3d4e5f6a1b2c3d4e5f6a1b2c3d4e5f6a1b2

LEGAL ATTESTATION

This certificate attests that on the date and time indicated above, a cryptographic hash (SHA-256) of the referenced digital file was computed and submitted to the Bitcoin blockchain via the OpenTimestamps protocol.

The blockchain record provides tamper-evident proof that the file existed in its exact form at the timestamp recorded. This proof is independently verifiable by any party using the original file and standard cryptographic tools.

HOW TO VERIFY THIS PROOF

1. Visit the verification URL or scan the QR code above

2. Upload your original file to compute its SHA-256 hash

3. Confirm the hash matches the recorded fingerprint

4. Verify the Bitcoin block confirmation on any block explorer
